

FOR IMMEDIATE RELEASE

HELM Analytics and eSignSystems form strategic partnership to bring Business Analytics to the eMortgage process

- SmartReporting creates cost savings and increases process efficiency in the eMortgage process. -

POWAY, CA, March 24, 2010

eSignSystems a division of Wave Systems Corporation (NASDAQ:[WAVX](#) - [News](#)) and HELM Analytics team up to deliver SmartReporting. A new module of eSign's Transaction Management Suite (eTMS), enables lenders and document custodians to capture information they require to manage their daily activities without compromising the legal integrity of their eMortgage documentation.

The SmartReporting module can be customized into a full business intelligence layer making it possible to integrate and leverage data from proprietary systems and third party data sources. SmartReporting custom integration makes it possible for customers to trigger automated workflow and exception handling which reduces manual processes. "As lenders and custodians implement eMortgage processes our technical solutions will play a critical part in their success" commented Kelly Purcell, eSignSystems executive vice president. "Today more than ever, companies must embrace technology to improve process efficiency and maximize ROI. eTMS and SmartReporting is the right solution at the right time." concluded Purcell.

SmartReporting augments existing reporting capabilities with on-demand reporting that enables proactive monitoring of electronic mortgage transactions. SmartReporting enables an organization to capture, track and report on key performance indicators along the entire eMortgage process and throughout the supply chain. The ability to integrate process efficiency, quality control and business intelligence creates a powerful total solution for lenders and document custodians. "For companies making the transition to eMortgage, Helm's deep mortgage industry expertise coupled with eSignSystems strong positioning in e-lending uniquely enables us to provide powerful and comprehensive solutions to our customers." stated Shay Tengan EVP of HELM Analytics.
